I WANNA

GO FAST!

Leading a Portfolio of NBMs

- Moving Past the Adaptive Challenge
 - What “direction” – via a portfolio of innovations and new business models – is most feasible for modulating speed? (Example: PA Unified Service Delivery Center)
 - What innovations and NBMs can we “scale/move” to a technical challenge? (Example: Amazon Fresh)
- Moving Past Turbulence (“Noise” and “Hype”)
 - Improve risk and variance – can we reduce “magnitude” and “frequency” (real and perceived)? (Example: TN AWS)
 - Can we increase “predictability” – to reduce uncertainty around ROI? (Example: Utah Fleet Analytics)

How Can We Go Faster Together?
